## USAutomatic's Solar Friendly Wireless Keypad provides radio based digital access control for Solar or AC Systems.

Our Solar Friendly rugged, metal companion device is weather-resistant and works with all gate openers equipped with a USAutomatic receiver. Power can be supplied with the included CR123 internal battery or hard wired to a 12 VAC/VDC source. Battery life ~30 months (optional 2nd battery may be installed for 2x life expectancy.)

## Features Include:

- Rugged die-cast locking aluminum cover
- 256 access codes
- 256 temporary access codes
- Hold open access code
- Radio transmission 433.92 mhz
- Keypad locks out for 60 seconds after 7 incorrect access codes
- Night light on/off programmable (controlled by twilight sensor)
- Internal buzzer
- Battery included or 12/24 Vac/dc external supply selectable
