

PRODUCT UPDATE

Patriot Control Board Part # 500002 (serial number 700001 and higher)

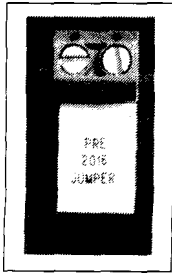

Effective January 12, 2016 all swing gate operators manufactured are required to have provisions for and to monitor for at least two independent entrapment protection means. Both are to be installed and operational to meet the standards defined in UL325 6th edition dated October 13, 2013.

NEW INSTALLATIONS:

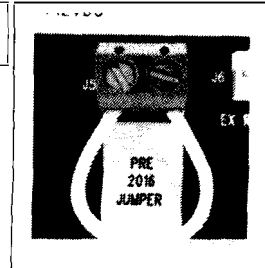

See Patriot manual for installation instructions.

SERVICING INSTALLATIONS INSTALLED BEFORE JAN. 12, 2016:

USAutomatic in an effort to help keep your cost down has designed all of our control boards with a "Pre 2016 Jumper" J5. When servicing USAutomatic operators manufactured before Jan. 12, 2016 it is recommended that the system be upgraded to the current UL325 standard. If it is not being upgraded then the Pre 2016 Jumper **must be** installed. If the system is being upgraded to the current UL325 standard then the "Pre 2016 Jumper" **must not** be installed.

Jumper Installed

*If system has a photo eye installed connect the 12 Vdc wire to J2 pin 12 and turn on DS1 switch 10
